Our Aims for the Season are

More Seeds, Better Seeds, Prompt Efficient Service.

ON THE FRONT COVER

YOU WILL SEE 12 OF OUR BEAUTIFUL SPENCER SWEET PEAS

These 12 varieties are put up in packets of about 50 seeds in each and sold for 5 cents a packet or the 12 for 45 cents. These Mixed 5 cts. a pkt. 20 cts. ounce.

QUALITY and PRICE are the great considerations in Seeds. You cannot afford to plant doubtful Seeds. Neither ought you to pay three or four times the cost of production. Over 40 years' growing and selling Seeds enables us to know how to grow Good Seeds and who grows Good Seeds. Our Seeds are carefully grown. We never use cheap "Job Lots" which can often be bought for half what good Seeds cost.

PRICE is another thing to consider. Paying more does not make seed any better. A Cabbage Growers' Association charged its members \$25.00 a pound for a superior grade

of Danish Grown Cabbage Seed. We found they were getting seed from the same growers and getting a lower grade of seed than we got and sold for \$2.25 a pound.

EXPENSES of doing business must be paid out of profits. We do business more economically than most seedsmen. We own our own buildings, seed farms, etc., pay no excessive rents, hire no high priced managers, have everything arranged to do business cheaply and efficiently. We also issue a cheaper catalogue than most other large seed houses. For these reasons we can sell Fresh, Reliable, Guaranteed to Grow Seeds cheaper than most other seedsmen.

PLEASE READ BEFORE ORDERING

REMITTANCES must accompany all orders. Send P. O. or Express money order if possible (the cost of a money order may be deducted from the amount sent). Money in registered letters is safe. Stamps taken for small amounts. Bank drafts or certified checks will be accepted. Do not ask us to send C. O. D.

WE GUARANTEE seeds to reach you safely; to be the varieties we sell them for; to grow under proper conditions and with proper care. We will replace free any failing in these respects if customers have reason to think the fault was in the seed. We cannot guarantee you a good crop as other conditions might prevent that. OUR ONLY GUARANTEE IS TO REPLACE SEEDS.

PARCEL POST. All seeds sent by mail or parcel post at prices quoted. Notice, in many catalogues you have to add postage or pay express charges.

ERRORS. Keep a copy of your order; notice the checker's slip to see if we report any omission (If we report it, we will send soon as we get it.) If not marked, report omission and we will correct. We have a most careful system of filling orders, still we might make a mistake.

WE ARE USUALLY PROMPT, filling orders the day received or the next day. Bulbs and plants are not always sent out promptly in cold weather.

ADDRESS. Look at your order the second time to see that you have written your full address, state and all, and written it PLAINLY. Hundreds of orders are lost every year because the address is gone or not decipherable.

CANADA customers please send P. O. money order as Canadian money and stamps are subject to a heavy discount in the States at present. Canada postal notes cannot be cashed in the U. S.

VEGETABLE SEEDS

The Best Varieties New and Old

We are putting the New Vegetables we consider worthy in the same list with the old Standard sorts. You can find them all together and read an impartial description of their merits. It has fewer outer leaves and it grows close to the ground on a short stem. The entire crop is exceptionally good. Earliness, ripening at one time, compact growth, large heads and high qualities are features which have made this Cabbage popular. Our seed of this is the choicest Danish grown. SWEET or SUGAR CORN

DELUE'S GOLDEN GIANT

A giant Sweet Corn, large as Evergreen and earlier than Golden Bantam.

Will grow over 20,000 marketable ears to the acre which at the lowest market price would net at least \$1,000.

Will sell for twice as much as other corn on the market.

We have grown many acres of it this past season and we find it some three to five days earlier than Golden Bantam sweet corn, with ears much larger, and yields twice as much per acre as the Golden Bantam. We also find the quality superior to that of the Golden Bantam, making it the most wonderful, early, productive, large eared yellow sweet corn grown in our forty-seven years of experience of growing sweet corn.

DeLue's Golden Giant excels all other varieties in size, productiveness and quality, and all of the late varieties in quality and early maturity. It is the one corn for the market gardener who wants the greatest amount of the highest quality corn in the shortest period of time from the smallest piece of land. It is because of the extreme tenderness, combined with the exquisite rich sugary flavor, that the Golden Giant has become the standard of perfection for sugar corn, and when you consider that its admirers report that it is one or two weeks earlier and two or three times as large as its own parent, the Golden Bantam, of better quality, deeper color and more productive, you may be sure that it has well earned the title of "The New Master of the Fields."—(Originators Description.)

In 1916 awarded the only medal given for sweet corn by the Massachusetts Horticultural Society in nearly 100 years, and each succeeding year since then it has been awarded first prize by the same society. In 1920 it won first prize and sweepstakes for best single ear at the corn show of the Massachusetts Department of Agriculture. In 1921 it won first prize, sweepstakes and medal for best ten ears at the corn show of the above Department. If you want the best, grow DeLue's Golden Giant.

which totally destroyed other varieties. It is a marvel of productiveness.

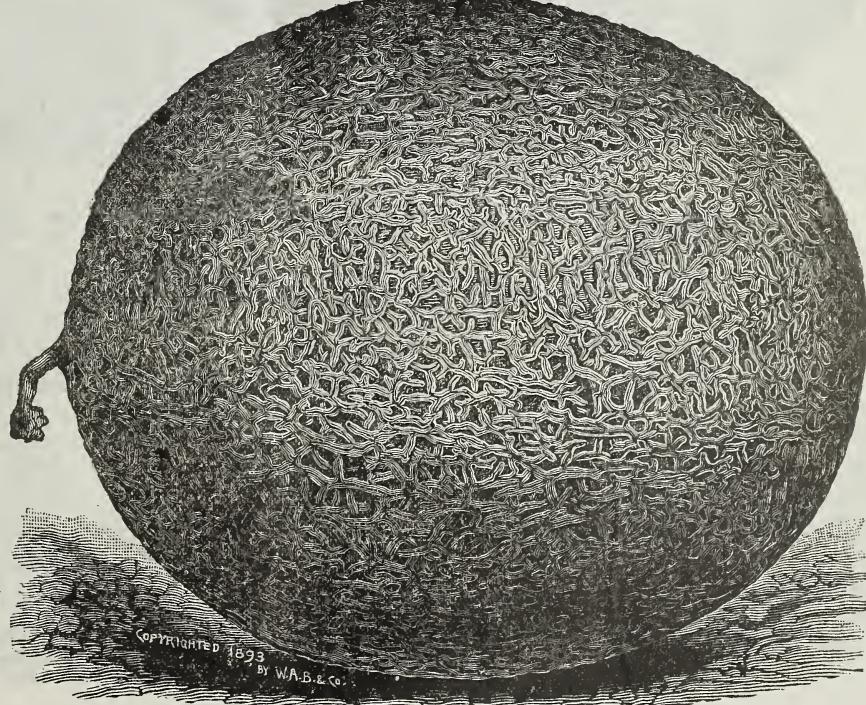

Lake Champlain planted the same day, side by side, with Early Watters, showed 24 days earlier, 30 days earlier than Golden Pollock, 22 days earlier than Paul Rose.

There have been other early melons—and other varieties that are hardy and vigorous but there is none besides Lake Champlain that combines those characteristics with the quality of the late maturing sorts. Pkt. 10c; $\frac{1}{2}$ oz. 15c; oz. 25c; $\frac{1}{4}$ lb. 80c; lb. \$2.75.

Early Watters Musk Melon

Extra Early Strain of
Rocky Ford

A valuable sort to plant for extra early. Sets a heavy crop of early Melons and is a continuous bearer. It is a most valuable sort to plant where first Melons on the market are of great importance; and has made the best record for money returns on account of its early maturity. It produces Melons of even size and shape. The well developed gray and green netting is very closely laced. The thick flesh is light green, spicy and sweet. It germinates a very vigorous plant that sets fruit early and seems to mature its crop in a short period. The large yield of early Cantaloupes when prices average high, is the strong point in favor of this strain. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 90c.

GOLDEN HONEY WATERMELON

Sweet as Honey—Color of Gold—No Hard Core or Stringiness

Golden Honey makes such a rich appearance when served on the table that it is considered quite the thing. The flesh is golden yellow in color, firm, crisp and glistening. It fairly melts in your mouth. Gold-

en Honey has a thin but hard rind that does not burst easily in carrying. They average 20 lbs. in weight and are oblong in shape, light green with broad mottled stripes of a darker shade. We predict great popularity for this grand new acquisition to the Watermelon family. Pkt. 5c; oz. 12c; $\frac{1}{4}$ lb. 30c; lb. 95c.

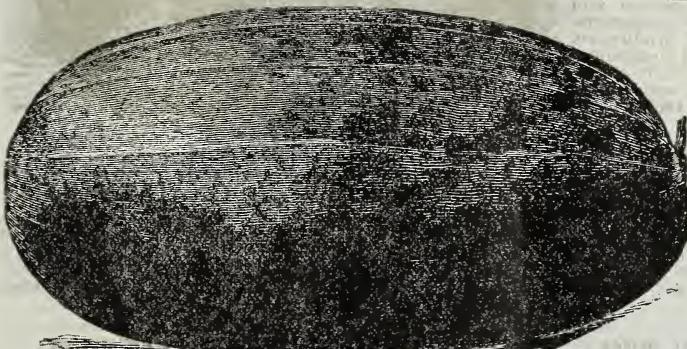

SUGAR BOY WATERMELON

Sugar Boy Watermelon is the sweetest, most delicious and most prolific Watermelon on earth. There is no Melon that can begin to equal it in quality, richness of flavor, lusciousness, deep, juicy, rich core, fine outward appearance, large giant size and extreme earliness. We say there is no Melon on earth that can approach it in the quality that goes to make a superb Melon. Sugar Boy Melon will grow to weigh

from 20 to 60 pounds, and every one of them, large or small, is sweet, tender, juicy, brittle, stringless and melting on the tongue. This Melon—being a cross of the Halbert's Honey, Monte Cristo and Kleckly Sweet—resembles very much the Kleckly in outward appearance. All we ask is a trial order, for once you grow them you are our customer from that time on.

Pkt. 8 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.25.

KECKLEY SWEETS WATERMELON

New Irish Grey Watermelon

This is a distinct and very valuable Melon, the productiveness is wonderful, producing more good merchantable Melons under the same conditions than any other variety; the eating quality is all that could be desired in a Watermelon, the sparkling red flesh is very sweet and entirely free from hard centers or stringiness, yet the flesh is very firm and compact and will not break when sliced. The size is uniformly large, color of rind, yellowish grey and almost as tough as that of the Citron, ripens earlier than Tom Watson and will keep in good condition for a long time after picking and stand long distance shipping better than any other Melon; for comparison the grower claims it will carry 1,000 miles distance and ship back over the same route, then open as good as fresh picked Tom Watson. Another important feature, the rind will not sunburn, and will keep in good condition for several days in the sun after becoming ripe, while all dark rind Melons will blister yellow on the top, which renders it unsaleable. The Irish Grey is beyond the experimental stage and you need not hesitate to plant it extensively. It is the best home market Melon as well as the best shipper; you will make no mistake to try it. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 85 cts.

A giant variety with fruit often 6 inches in diameter and yet of the very finest quality. Vines vigorous and productive, often giving a good crop when others fail. Color a rich, handsome red. Very firm fruit of the best quality. Large, handsome fruit of this size command a much better price than others in the market. Pkt. 5c; $\frac{1}{2}$ oz. 15c; oz. 30c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.75.

Alpha Pink Tomato

A purplish pink, main crop Tomato of the largest size. The vines are vigorous and very productive. The fruits are very solid, with exceptionally few seeds, fairly smooth and considered a very good quality, especially by those who prefer a Tomato quite free from acid. It is very desirable for slicing. Pkt. 5c; $\frac{1}{2}$ oz. 15c; oz. 28c; $\frac{1}{4}$ lb. \$1.00.

Greater Baltimore Tomato

A GREAT CANNER AND SHIPPER

Outyields all other Tomatoes by actual test. This is now one of the greatest canning Tomatoes grown. Fruit very large, smooth, well-formed and deep. Extra firm, solid and heavy, ripening up crop evenly to stem; free from ridges, cracks and blight. It will yield more than any other Tomato and is one of the best shippers grown. Color beautiful, brilliant red. Plants vigorous and compact, producing enormous clusters of fruit. Tomatoes often weigh 2 pounds each. 400 to 600 bushels of fruit has been produced on one acre. Pkt. 8c; $\frac{1}{2}$ oz. 15c; oz. 25c; $\frac{1}{4}$ lb. 65c; lb. \$2.25.

BEEFSTEAK TOMATO

The name Beefsteak has been given to several Tomatoes, which are especially noted for a solid, meaty core and unusually large size. The Beefsteak Tomato possesses these good points—heavy, solid, fine flavored, meaty flesh, etc., and is, we think, one of the best varieties grown. Vigorous grower, very productive and continues to produce large sized fruits until frost. Its luscious fruit is large to extra large; very meaty and solid, with few seeds. Its color is a brilliant shade of red and one of the most beautiful Tomatoes we have ever seen. Foliage heavy, protecting the fruit from sunscald during late summer. Pkt. 10c; $\frac{1}{2}$ oz. 15c; oz. 25c; $\frac{1}{4}$ lb. 90c; 1 lb. \$3.25.

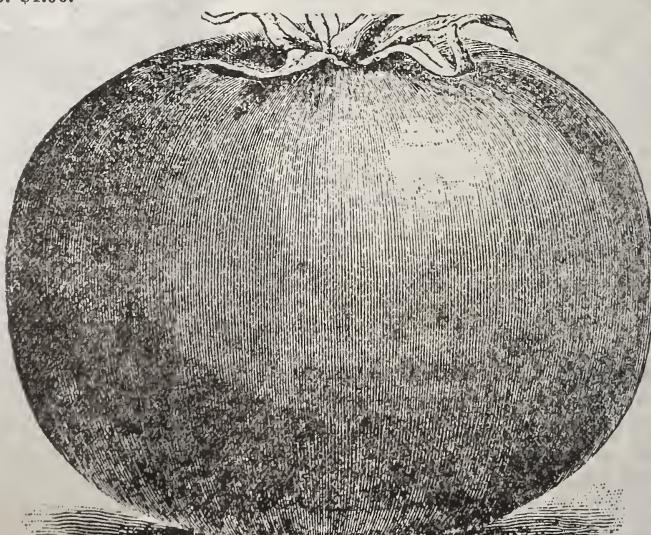

DEPOSIT BIG DWARF TOMATO

MAMMOTH TOMATOES ON DWARF ERECT VINES

This big fruited but erect-growing variety is one of the most important advances made in recent years in the line of Tomatoes, especially adapted to home gardens. Those who have attempted in the past to grow Ponderosa with its sprawling habit of vine may now have the same quality of fruit on strong, erect vines, requiring only one-fourth the space. The main stem or stalk grows about 20 to 24 inches high and is very stiffly erect. The fruits are immense, making Big Dwarf by far the largest fruited erect-growing sort in cultivation. The color is a rich crimson tinged with purple, making it surprisingly attractive when exposed for sale. Pkt. 8c; $\frac{1}{2}$ oz. 20c; oz. 35c; $\frac{1}{4}$ lb. \$1.25; 1 lb. \$4.25 prepaid.

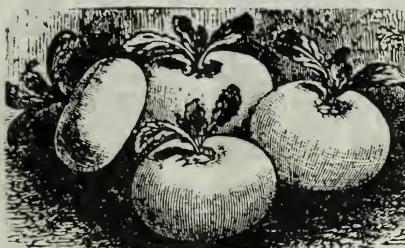

YELLOW PONDEROSA TOMATO

Similar to Ponderosa except in color which is a clear yellow. This giant Tomato is one of the best large yellow varieties. The fruit ripens early and bears well until very late; very solid, almost seedless, of good sub-acid flavor and of immense size, frequently weighing considerably more than 2 pounds. Somewhat scattered on the vine and a small percentage are rather rough. Pkt. 8c; $\frac{1}{2}$ oz. 15c; oz. 30c; $\frac{1}{4}$ lb. \$1.00.

BANGHOLM RUTA BAGA

This variety is the most largely grown of all Ruta Bagas or winter Turnips in Denmark. The most productive, yielding more to the acre than any variety we have tested. Pkt. 4c; oz. 9c; $\frac{1}{4}$ lb. 20c; lb. 65c.

WHITE SWEET SWEDE OR SWEET GERMAN

An excellent keeper and very desirable either for the table or for stock. The tops are small, with leaves cut at the edges. The roots are very large, nearly globe shaped or somewhat top shaped with small neck; color white with a shade of green or bronze at the top. The flesh is white, very firm and sweet. Pkt. 5c; oz. 9c; 2 ozs. 15c; $\frac{1}{4}$ lb. 20c; lb. 50c; 3 lbs. \$1.75 by mail.

Petrowski Turnip

This is a distinct variety of early maturity. The roots are flat, medium size. Skin is a rich, orange yellow, very smooth. The firm flesh is fine grained, crisp and of fine flavor. The roots are flat, of medium size, purple or dark red above ground, white below. The flesh is white, fine grained and tender. Purple Top White Globe

This excellent table variety is globular in shape, of good size and very attractive appearance. The flesh is white, fine grained and tender. Long White Cowhorn Turnip

A large, long Turnip extensively grown for stock feeding, etc. Good quality and yields large crops. The variety is of very rapid growth and well adapted for fall and early winter use. Pkt. 5c; oz. 9c; $\frac{1}{4}$ lb. 15c; lb. 50c; 3 lbs. for \$1.25.

SOUTHERN PRIZE TURNIP

Superior to Seven Tops. Extensively grown in South where tops furnish an abundance of cuttings for greens, salads, forage, etc. Bottoms also make good stock feed. Pkt. 4c; oz. 8c; $\frac{1}{4}$ lb. 15c; lb. 48c.

BUDLONG WHITE ROCK

One of the earliest maturing, sweetest and best table Turnips grown. Cooks very quickly and always of excellent flavor. Good winter keeper. This is really an extra early sweet Ruta Baga. Pkt. 5c; oz. 12c; $\frac{1}{4}$ lb. 25c; lb. 85c.

GRASS AND CLOVER SEED

ALSIKE CLOVER

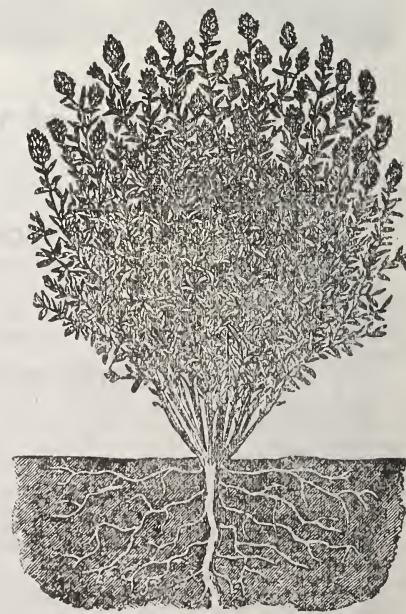

This perennial is the most hardy of all clovers. On rich, moist soil it yields an enormous quantity of hay or pasture but its greatest value is for sowing with other clovers and grasses, as it forms a thick bottom and greatly increases the yield of hay. The heads are globular, fragrant and much liked by bees. $\frac{1}{4}$ lb. 15c; 1b. 40c; 3 lbs. \$1.10 by mail.

ALFALFA

In many sections this is considered the greatest money making crop grown, and is one of the very richest in food values, doing away with the necessity of purchasing so much commercial feed. Alfalfa often yields 3 to 5 tons per acre at one cutting and can be cut 2 to 4 times during the season; enriches the soil. Best sheep food known; richer than other clovers; fine for dairy cows which produce milk. $\frac{1}{4}$ lb. 20c; lb. 60c; 2 lbs. \$1.00; 6 lbs. \$2.50.

ALFALFA PLANT

Bacteria, Fertilizer, Spray Tabs, Etc.

A SEED AND SOIL INOCULANT

That Increases Crop Production and Greatly Improves the Soil

Soil and crop experts agree that for best growth, and to put atmospheric nitrogen in the soil, it will pay all farmers to inoculate all legumes, even where they are at present successfully grown. The cost is trivial when compared with the profit it will bring you. Legumes are clovers, peas and beans, alfalfa, soy beans, vetches, and other plants that grow their seeds in a pod. Their roots are the home of bacteria that draw fertility-building nitrogen from the air and store it in swellings on the roots, called nodules. These nodules not only feed nitrogen to the crop they are on, but rot away in the ground and supply valuable nitrogen to the soil for future bumper crops of corn, wheat, cotton, oats, fruits, etc.

Economical—Easy to Use

The 1-A size bottle will inoculate: Clover 15 lbs., alfalfa 20 lbs., Canada field peas 100 lbs., vetch 60 lbs., soy beans 75 lbs.; other sizes in relative proportion. Place seed in a pile, fill bottle with water, add a little sugar, shake and moisten seeds; when dry, plant in usual way. This is infinitely easier, safer and better than the old laborious soil transfer method.

We have a special composite culture for garden peas, beans and sweet peas; ask for No. 5, 50c and you will insure large, luscious peas and beans, and abundant sweet pea blossoms of wonderful coloring.

When ordering, be sure to specify the kind of seed you wish to inoculate. Prices: 1-acre size, \$1; 3-acre, \$2.50; 12-acre, \$9. Full directions accompany each bottle.

Our Superb Double Zinnias

The wonderful improvements in size, and doubleness and the new, varied and unique shades of colors have brought Zinnias rapidly to the front in the last few years. With the possible exception of Asters, Nasturtiums and Sweet Peas no annual flower is now more extensively grown. Seed sown in spring commence blooming in June or July and flower profusely till frost. Look well in bouquets.

Dahlia Flowered Zinnias

When Dahlia Flowered Zinnias were introduced two or three years ago it was predicted that they would soon take precedence over other Zinnias as Spencer Sweet Peas have over other Sweet Peas.

Fourteen distinct varieties of Dahlia Flowered Zinnias are now grown and offered only in Mixed Colors for this season. They come in pastel shades marked and colored in very distinctive manners.

855—Dahlia Flowered Zinnias Mixed. A giant mixture of the 14 varieties. Pkt. 10c; 3 pkts. 25c.
